Loading the TCP file in TallyPrime

Copy the TCP file to local Folder. Suggested to copy to TallyPrime Folder. After this follow the below steps.

1. Go to TDL Management.
You can access the TDL Management report in the following ways:
Go to F1:Help > TDL & Add-On
OR
Go to F1:Help > About
Go to the section TDL & ADD-On. Press enter on the required data.
OR
Use Shortcut CTRL+ALT+T from anywhere in TallyPrime.

2. Click F4: Manage Local TDLs. TDL Configuration form appears.

Load selected TDL files on startup : Yes		
TDL Path	File Name	Load TDL
D:\		Yes
	File Selection	
		Specify Path Select from Drive
	◆ End of List D:\	File
	+ Up	

3. Set Yes to Load selected TDL files on startup.

4. Select the required from the file selection screen by selecting the options Specify Path or Select from Drive.

By selecting the option Specify Path you can mention the directory path and go ahead with the configuration.

By selecting the option Select from Drive you can traverse through the explorer and select the files from the system.

Settings in Tally Prime

- 1. Go to F1:Help > TDL & Add-On
 2. Click the button "Add-On Features" or press <F6>
